Video format or mime type is not supported Posted by missevee - 2014/10/22 08:30
Hey,
Trying to get videos to show up on my site http://holotech.se. The links are http://holotech.se/esprit/profitmilling and http://holotech.se/esprit/esprit-2014. But all I get after numerous attempts of writing a correct searchpath is "video format or mime type is not supported".
The files are laying on a Small Business Server from 2011 if that has anything to do with it?
Would really appreciate your help!
Best Regards Evelina

Hello,
Download the extension from "Member Area" on our site and update the module. After this clean browser's cache. It should help.
Regards, ARI Soft

Tried that now but it's still not working, now I only get a white lightbox with nothing in it.
I forgot to tell you that the videos worked fine when I had the site locally, it was when we changed server that the problems occured.

This is a what the code looks like:
{arisexylightbox activeType="rcontent" width="792" height="294" url="http://www.holotech.se/clips/Syncronization_x264.mp4" title="Syncronization"} Synchronization & Optimization
{/arisexylightbox}

ARI Soft Forum - ARI Soft

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards ARI Soft
