
Plugin Code

Posted by ddayco - 2014/12/19 22:31

Documentation doesn't actually explain how to use the plugins, it says:

"Just enter a plugin code in the place where you want to use the extension."

Where do I find the correct codes and syntax?

I want to create thumbnails that will play vimeo videos when clicked.

Sorry... I did not see the usage section. I got it now.
