
How to stop at end of each slideshow

Posted by aggie88 - 2015/05/07 17:30

I have 5 individual slideshows in separate module positions but after the last image of a slideshow, the next slideshow automatically starts. How do I get SexyLightbox to stop when it reaches the last image of each specific slideshow and not automatically continue on to the next slideshow?

Hello,

Could you send a link to a page where the problem occurs?

Use different values for each module instance in "Group" parameter.
