
Article with no padding to left border

Posted by rudi72 - 2015/05/17 20:53

Hallo,
im using now Joomla 3.1.4 and has updatet the lightbox to 1.11.5
My testside is My Testside.
For the Menu in the left colomn i set at Lightbox Links the following code:

```
"UL.ux-menu-vertical A.ux-menu-link-level-0"|width=800&height=550&tmpl=component  
"UL.ux-menu-vertical A.ux-menu-link-level-1"|width=800&height=550&tmpl=component
```

All articles in the Lightbox starting directly at the left border.
How can i get a padding-left: 15px for example?

At the template.css i put in the ID

```
#SLB-Contenido {  
padding-top: 15px;  
padding-right: 15px;  
padding-left: 15px;  
}
```

But there is no change in the Lightbox.

Can you help me?
Thank you!!

=====

Hello,

These paddings should be defined in site template for "component" view. Open component.php file from site template folder and add the following code between `<div>` and `</div>` tags:

```
.item-page {padding:15px 15px 0 15px;}
```

Regards,

Hallo Experts,

i have another question:

How can i make it, that the Guestbook "IBF-Gästebuch" in the Topmenu, is working komplettly in the Lightbox?
Now only the entrys are displayed in the Lightbox, but when i want to make a new entry,"Neuer Eintrag", then the komplette website is displayed.

For the Components in the Lightbox are also padding: 0

Anmeldung, Gästebuch, Downloads

Where can i change this?

Regards Rudi72

It requires to modify you guestbook extension that it adds "tmpl=component" parameter if it is defined on main page.
