
Sexy Lightbox does not work

Posted by vrtaak - 2015/07/13 09:43

Hello,
I am using Sexy Lightbox on several Artisteer templates, there is working fine. But now I have installed template from ThemeForest and there lightbox does not work. I tried change template from default Joomla 3 installation (Beez, Protostar) and there also does not work...
Here is test page
thank you

Hello,

Check that the latest version of the extension is installed on your site and set "Load jQuery Method" parameter to "Local copy" value in module/plugins settings.

Hello,
I have version 1.11.5, it is not latest. This is probably the problem...?
So the solution is to buy the latest version, is not it?

The latest version is always available in "Member Area" on our site. Set "Load jQuery Method" parameter to "Local copy" value in module/plugins settings.

Aha, I saw in the NEWS that the latest version is 1.5.4, and in the Member area I saw 1.11.5, so I thought that I do not have access to the latest version.
So I installed this version and it's working fine.

Thank you very much!
