
Link lightbox from image

Posted by kirkkester - 2015/12/06 19:36

Dear Admin,

I would like to purchase this extension, but have just one question before I buy.

I want to be able to link a lightbox from an image. So when you click on the image, the lightbox would come up.

Is this possible? Sorry, but I really could not find any documentation on this.

Thank you in advance for your help and cooperation!

Kirk

Hello,

The extension supports this ability. For example it can be done with help of "System - ARI Sexy Lightbox Anywhere" plugin. Plugin code will look like:

```
{arisexylightbox activeType="rcontent" width="800" height="600" url="http://www.ari-soft.com" title="ARI Soft"}{/arisexylightbox}
```

Regards,
ARI Soft

Thank you very much for responding so soon and with the answer I was looking for! :)

So all I will need to purchase is your ARI Sexy Lightbox? This is correct?
