ARI sexy lightbox

Posted by rd0120 - 2016/03/30 15:41

Hi There,

I purchased the above software back in July 2015.

However l have attempted to use it today while building a new website in Joomla 3.5 and unfortunately it does not seem to be working.

I have a image which displays fine and am linking the lightbox module to the image and a fox contact form.

This plugin has worked before however does not seem to working on this Joomla website.

Please could you help?

Regards

Hello,

Is it possible to see the problem?

Regards,
ARI Soft
