How to change size of lightbox

Posted by helaman - 2016/05/04 04:08

_____

I would like to have the lightbox larger for text or be able to modify for different popups. How can one make the box bigger?
In other words I do not want to have scroll bars when it is only one or two lines not showing.

TIA

_____

never mind....have been coding since 7am and now 9pm.....my eyes are a little buggy
didn't see the code right in the link, 8-)

BTW, its looks like a great extension will need to play with it some more.

thanks
