
Joomla! Toolbar Links in Lightbox?

Posted by proshowmediagroup - 2010/08/27 18:48

I am wanting to show the Joomla! article links (ie: pdf,print,email) in a lightbox. I'm also using K2 for a product catalog and would also like to be able to do the same thing in my item views.

Have been wrestling with this for three weeks with the ArtSexy Lightbox, but to no avail. Just purchased Arisexy and I really like the features but still not understanding how I can accomplish this. I'm sure there will be separate syntax for each action, but I'm needing to get this resolved (if possible) so I can move on to the next nightmare... Any help?

Hello,

Could you provide link to page where we can see links which you want to display in sexy lightbox? If you provide temporary access to your Joomla! backend by email we can try to configure plugin on your server.

Regards,
ARI Soft
