
Photo thumbnail not apear

Posted by greenie - 2010/09/19 13:14

I try to make a photo gallery after a folder.

I put

{arisexylightbox activeType="imglist" dir="images/stories/medimpex"}{/arisexylightbox} in article.. but nothing happened..

Blank page...

I installed and make active all 3 plugins and module.

This is the result.. Any clue.. What am I doing wrong?
