
SexyLightbox and K2

Posted by elisa - 2010/10/21 09:17

Hi there,

first of all thanks for your help with the Menu, after that i bought SexyLightbox. IÒ'm using K2 on all my sites, and i like to insert the embedcode in the User-Info but that doesnÒ't work with sexylightbox.
Is there any solution for that?

Thanks!

Elisa

Hello,

Could you specify what code you use and what doesn't work? Could you provide link to page where we can see the problem?

Regards,
ARI Soft

Yes, you can see this on this site at the bottom:
<http://tinyurl.com/34gvhzw>

Thanks!

Check that 'System - ARI Sexy Lightbox Anywhere' plugin is enabled and 'Mode' parameter is set to 'Anywhere'.

oops sorry for wasting your time. The Module was enabled, but set to content, i thought it was active for every use.

Thanks again!!
