
Lighbox moves around and disappears in IE8

Posted by potski205 - 2010/10/26 15:46

Hi,

I wonder if you anyone could help. Lightbox keeps moving around and then disappearing off the screen in IE8. Is there a bug or have I done something wrong?

This is an example:

http://www.cloudcreative.co.uk/index.php?option=com_content&view=article&id=74&Itemid=103

And this is my code:

```
{arisexylightbox activeType="imglist" dir="modules/mod_arisexylightbox/images/commercial/soseki/soseki"
opt_enableShow="1"}{/arisexylightbox}
```

Thanks in advance.

Hello,

This a conflict with /templates/guildprime/scripts/maxheight.js script from your site template, we have sent update by email.

Dear ,

I have the same problem.
Please check my link :

It only happens when the xplorer is in maximized view.

Can you help me on this, or tell me how to fix it?

Best Regards,
Vandamme Wouter

Hello,

Sorry, but when we open your page in IE 8 and IE 7 it works fine.

PS: BTW, you use "ARI Sexy Lightbox Lite", but this thread about "ARI Sexy Lightbox".

Regards,
ARI Soft

Hello,

It is solved, I installed the latest plugin, and problem fixed itself.

I have the same problem, I did update to the last version ARI Sexy Lightbox v. 1.6.4 and the problem persit.

My site is Voxturi.com and you can see the problem in the module CLIMA, thanks

It is another problem. It looks like javascript conflict, you can see that IE error console contains javascript error. We will investigate this issue in more details and report about results soon.

We have investigated this problem in more details. This is not "ARI Sexy Lightbox" problem. This IE browser problem, you can read about it [here](#). In brief, IE browser can load only 32 included CSS files. Your site contains a lot of CSS includes and IE browser can't load all of them. You can use CSS and javascript compress plugin like JCH Optimize that avoid this problem.
