
Article in lighthbox issue

Posted by gambin - 2010/10/28 22:59

Hello

I would like to use in an article more that 2 lighthboxes which show other articles.

For that i use the plugin "arisexylightboxanywhere" and the following code in an article:

1/
{arisexylightbox activeType="article" width="600" height="390" id="53" link="Monet" title="Claude Monet (1840-1926)"}{/arisexylightbox}

2/
{arisexylightbox activeType="article" width="900" height="650" id="54" link="La France 1500" title="La France 1500"}{/arisexylightbox}

Both seems correct but 1/ works :) and 2/ fails. :(

When i put first 2/ then 1/, 2/ works :) and 1/ fails. :(

Please, is there somebody who could help me to solve this issue ?

Page can be seen at www.andurand.eu

Thank a lot.
Jean-Marc

:)

Hello,

It seems currently the page contains only one link and it works. Could you provide link to page where we can see the issue and if it's possible could you provide temporary access to your Joomla! backend by email?

Regards,
ARI Soft

Yes, it works ! And i've added a third one. :)

I have another trouble. :(

When I use inline content lighthbox, it is put a the beginning of a line ? Is it normal ?

{arisexylightbox activeType="icontent" width="300" height="250" link="Click me" title="Hidden text"}Inline content which you want to show in sexy lightbox goes here.{/arisexylightbox}

You can see the example in the same article.

Thanks a lot for your answer.

Cheers.
Jean-Marc

Try now please. It was a problem with WYSIWYG editor. It adds wrap all new paragraph with

HTML tag, "ARI Sexy Lightbox" wraps inline content with HTML tag and it caused the problem because tag can be placed into

tag. We updated the extension and add possibility to specify wrap tag with help "wrapTag" parameter.

Regards,
ARI Soft

Everything work fine.

Thanks a lot for your help and quick answer.

It is very professional.

Regards.
Jean-Marc :) :) :) :) :) :) :)
