## images instead of a link to youtube

Posted by zumaro - 2010/10/30 04:52

---

Hi!

I need show images instead of a link to youtube:

Example:

```
{arisexylightbox activeType="rcontent" width="800" height="450"
url="http://www.youtube.com/watch?v=4W21XYdCgMc"
link=""
title="Video"}
{/arisexylightbox}
```

Please showme the correct way.

Thanks

---

Hello,

Use the following code:

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=4W21XYdCgMc"
title="Video"}{/arisexylightbox}
```

Regards,

Hello,

It seems this problem with site template. We suppose it contains incorrect code for remove MooTools library. Probably it contains the following code:

```
$headerstuff = $this->getHeadData();
$headerstuff = array();
$this->setHeadData($headerstuff);
```

---

but correct code should look like:

```
$headerstuff = $this->getHeadData();
$scripts = $headerstuff;
foreach ($scripts as $path => $val)
{
    if (strpos($path, 'mootools.js') !== false || strpos($path, 'caption.js') !== false) unset($scripts);
}
$headerstuff = $scripts;
$this->setHeadData($headerstuff);
```

I don't believe mootools is missing, I have used it on some other lightbox app, but i needed your because i couldn't embed videos.

Do you wanna take a look from the admin page?

How do i send the details?

Thank you

Thank you, I am really happy now, I would like to know what you changed if possible.

And i have another small request, I looked in the settings but i couldn't find anywhere.

On the header of lightbox there is a white space which on your preview page looks black, i would like to have that black too.

Here is a screenshot attached.

Thank you for a great plugin [http://www.ari-soft.com/images/fbfiles/images/sexy\\_lightbox.jpg](http://www.ari-soft.com/images/fbfiles/images/sexy_lightbox.jpg)

As we wrote in our previous mail your site template contained incorrect code for removing MooTools library, it removed all javascript includes which were done through Joomla! API. It could cause problem with a lot of other 3rd party extension, but we fixed this code. About background, you can define it, if add bgColor="#000" attribute to {arisexylightbox} tag or set default background in "System - ARI Sexy Lightbox Anywhere" plugin settings with help "Background" parameter.
