## Hyperlink from Lightbox Image

Posted by DShapiroNaples - 2010/12/10 15:45

---

I am using the Image Gallery Single Image option in a module. I would like to be able to have the user click on an image that appears in the lightbox slideshow and have that navigate to a particular article. Is this possible?

Each image will have a unique article they will need to link to.

Hello,

Do you want to redirect a user to specific article if s/he clicks by image into lightbox?

I want a lightbox to appear when a user click on an image. Then, if the user clicks the lightbox image I want that to hyperlink to an article

We have updated the extension. New version provides ability to connect images in lightbox with external links. Download extension package, upgrade the module and the plugins and place necessary links into CSV file with descriptions in "Link" column.

Any special install instructions? Do I just install again as though it was a new install (e.g. Download zip file and use Joomla Module installation process)?

---

Upgrade process doesn't require to uninstall previous version of the module (or the plugin). Just install new version over installed extension.

Download and upgrade the module please. It should help.

PS: This issue occurs only in IE browser.
