Select \"No animation\"? choppy animation
Posted by gkar2000 - 2010/12/26 04:26
_____

1. Hi I just purchased the Sexy lightbox for my site, the animations look a bit choppy and laggy on my site. Im using it together with the cloud carousel. How can I improve, cause this is not nice.

2. Is there a way to switch off animations? like the shaking and resizing animation are a bit to excessive on my page. Woul d like to see/try them without those.

Hello,

You can set "Resize duration", "Shake duration", "Shake loops" and "Shake distance" parameters to "0" that avoid shake and resize animation.

Regards,
ARI Soft

I already tried that, but it didn't avoid the anim from showing up. Recheck te link in the post before, it shows the animation for a split second which changes the size of the lightbox for a split second. Is there another way to change it to skip it? This would solve my problem as a whole.

Upgrade the module to v. 1.7.3 please. It is available in "Member Area" on our site. New version keeps lightbox size during loading new image when a user clicks next or prev button.

PS: Sorry for incorrect value for "Resize duration" parameter, it must be greater than 0.

Regards,
ARI Soft
