

# Background colour for rotated images

Posted by peterva - 2011/02/17 22:55

Hi, I am using Ari Colorbox with the thumbnail images on a transparent background. When I rotate the thumbnails, the thumbnail background gets white. Is there a way to set the thumbnail background to transparent?

Hello,

Currently the extension adds white background for rotated images, but we will investigate possibility to add transparent background and report about results soon.

That would be great. In the meantime, I would like to use custom thumbnails.  
But ... when I specify the thumbnails path (in my case "thumbs/{"\$fileName}") I get my own thumbnails + auto-generated thumbs. How do I get rid of the auto-generated thumbs?

Set "Image gallery -> Generate thumbnails" and "Image gallery -> Scan subfolders" parameters to "No". It should help.

Hmm ... thanks for the quick reply but both parameters are already set to 'no'. Is there another trick? By the way, I'm using the following 'advanced' settings to display the gallery.

```
{repeater}
  & & {headertemplate}
  & & & &
  & & {/headertemplate}
  & & {rowtemplate itemCount="3" rowClass="odd;even"}
  & & & &
  & & & & & {celltemplate}
  & & & & & &
  & & & & & & & & {$data:colorboximage}
  & & & & & & &
  & & & & & {/celltemplate}
  & & & & & {emptycelltemplate}
  & & & & & & &
  & & & & & {/emptycelltemplate}
  & & & &
```

Â Â {/rowtemplate}  
Â Â {footertemplate}  
Â Â Â Â  
Â Â {/footertemplate}  
Â Â {emptytemplate}  
Â Â Â Â No items found  
Â Â {/emptytemplate}  
{/repeater}

The 'cleanlink' class is to override my templates a:link settings.

Could you provide link to page where we can see this issue and temporary access to your Joomla! backend by email that we can investigate this problem?

Thanks, but could you also provide link to page where we can see the issue and unlock "ARI Colorbox" module (open module settings page on backend and click "Cancel" button in toolbar).

New version of "ARI Colorbox" provides ability to define background color for rotated images.
