I cant do it to work, please help

Posted by Aquiles - 2011/02/23 09:24

_____

Hi,

I dont know what i am making wrong but I cant do it to work. I have installed the module and the plugins aricolorbox and aricolorbox anywhere. First of all I have enabled the plugins and then I have made a Jumi module which contains the next code for a colorbox that contains an external page:

Also i have added the next code in the same Jumi module for a colorbox that load an inline content:

But the external page not load (the colorbox opens but nothing inside) and the video shows an irregular proportion:

Also i have tried to do the same inside the page content but it happens the same. Here i dont know how to make it to work with a link that is an image, not text.

You can see this here: http://www.ulises.com.es

Also I have attached an image with some appointments.

THANKS FOR YOUR SUPPORT and sorry by my poor english

_____

Hello,

About the first issue, it is not an extension problem. Remote page is protected from loading it into . You can see it if try to use simple HTML code:

This page uses javascript that protect loading into frame window.

About the second issue, you can use one of the following code:

1.

2.

3. Enable "System - ARI Colorbox Anywhere" plugin, set "Mode" parameter to "Anywhere" and use the next code:

{aricolorbox activeType="rcontent" opt_width="853" opt_height="510"
url="http://www.youtube.com/embed/F3V708SjGRk" title="RC Tecnic - Nos presentamos"}{/aricolorbox}

Regards,
ARI Soft

THANKS!! for your help and fast reply. Now it works !!

I didnt know that the page i was trying to load is protected from loading into iframe.

Thanks again.

Aquiles
