Picasa Galleries not loading, just single image

Posted by jeffbetts - 2011/03/01 02:42

_____

The thumbnails are being created for each of my 4 galleries, but the full size image opens on a blank page when album thumbnail is clicked, no lightbox, none of the other images show... Any ideas what I could be doing wrong? url http://greaterworksfamily.southernsoulbbg.com/photo-gallery.html Please take a look and let me know what's wrong. It worked when I only had one gallery in picasa. ???

_____

Hello,

Javascript conflict occurs on the page. Download and upgrade "ARI Colorbox" module please. It should help.

Regards,
ARI Soft
