## Close colorbox from link

Posted by peterva - 2011/03/02 13:48

---

Is there a way to close Colorbox from a hyperlink in an iframe?

Example:

I open a text in a Colorbox iframe (rcontent)

In the text is a hyperlink

on click of this link, Colorbox closes and opens the linked page in the normal window.

Hello,

You can place the following code into iframe content:

Close

Use the following code:

Close and navigate to ARI Soft

or the next code:

ARI Soft
