
Colorbox Anywhere Gallery Problem

Posted by thecda - 2011/04/19 18:39

Hi,

Trying to do a gallery with the colorbox anywhere plug-in this is the code I'm using, can spot anything wrong with it?

```
{aricolorbox activeType="imglist" dir="images/stories/riders/lmechura_pics" mainClass="riders-gal"
generateThumbs="true" thumbWidth="70px" thumbHeight="70px" thumbType="cropresize"}}{/aricolorbox}
```

Just can't work it out, any help greatly appreciated. Page loads ok but no thumbnails showing.

Thanks,

Paul

Hello,

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate it?

Regards,
ARI Soft
