
Colorbox slideshow functionality w/ Slick Gallery?

Posted by pjgirl - 2011/06/23 15:39

Hi, Just wondering it is possible to make the slideshow option functional in Colorbox when it is integrated with Ari Slick Gallery? (Or does the slideshow function only work when Colorbox is used on its own?) I have enabled the slideshow, but it does not show up in the lightbox.

Thanks in advance!

Hello,

"System - ARI Colorbox" plugin settings page and set "Enable slideshow" parameter to "Yes".

Regards,
ARI Soft
