Link to next colorbox from within a colorbox

Posted by andrewau - 2011/08/31 11:48

_____

Hi,

How can I have it so there is a next and previous on colorbox popups. I am using the plugin System - ARI Colorbox and have the following loaded into an article:

 - link 1

 - link 2

Which works fine, however I need to add a next and previous so that the user can open the next article without closing the original colorbox. How is this possible? Thanks in advance

Andrew

_____

Hello,

Use the next code:

 - link 1

 - link 2

Regards,

WOW - that has to be the quickest reply I have ever had. Excellent support and it worked fantastically. Thanks once again.

_____

Hi Again,

I have just realised that using articles is displaying the site template, whereas I only need a content box with white background. How is this done? Thanks again.

_____

Use the following code:

 - link 1

 - link 2

In other words, add tmpl=component request parameter to link.

Regards,
ARI Soft
