## Stuck Loading

Posted by natselection - 2011/10/03 22:29

---

Joomla 1.5.23

Hopefully I have just overlooked something simple. I'm trying to open an article into a colorbox but the box opens and the loading symbol just spins.

<http://natselection.com/subscription/subscriptions/new/5> 3/4 down the page it's the Acceptable Use link.

If I hit the next button the box fades out and in and loads the article correctly.

Heres the code I'm using:

Acceptable Use Policy

Screenshot of plugin settings.<http://www.diigo.com/item/image/1i0hc/iqwk>

I tried a ton of setting combinations with no change. I think I need to use the local jquery because I need to turn ssl on and so far I have yet to use many plugins that pull the https version from Google automatically.

Hello,

This problem with HTML source of provided page. It contains `<script>` and related tags twice. It is incorrectly. We suppose it occurs because incorrect code for Google Analytics is used. We can investigate the issue in more details if you provide temporary access to your J! backend by email.
