
Show single image from existing thumb

Posted by smartwebs - 2011/11/24 13:57

Hi
I need to show an Full size image in Ari Colorbox, from an existing thumbnail
Just can't figure out how to code the thumbnail to show the full image in Ari Colorbox.

I also need to add a description and a download link within the popup

Can someone show me the code I need to apply

Thanks for your help

Hello,

If you want to show custom thumbnail and if a user clicks by it, show an image in the lightbox, you can use the next HTML code for "System - ARI Colorbox" plugin:

Where LINK_TO_IMAGE is a link to an image and LINK_TO_THUMB is a link to a thumbnail.

Regards,
ARI Soft

Thank you, but how do I add a Description and download link to a .pdf file to show within the colorbox popup

Thanks again
Marc

The extension can show only title. A link can be added to a title. Code will look like:
