
ARI Colorbox with Flickr and \"privat\" permissions

Posted by kik - 2010/11/05 12:00

I want to use ARI Colorbox for showing Flickr photos on my Joomla website.
It seems that it only can show photos from Flickr with the permissions set for "Anyone" in Flickr.
Is it really not possible for ARI Colorbox to show photos from Flickr when the permission is set to "Only you" on Flickr?

Hello,

We have updated "ARI Colorbox" module and "System - ARI Colorbox Anywhere" plugin. Now it can show private Flickr photos, just enter Flickr secret key and token in module or plugin settings. More information about it can be found in "Description" field on module settings page.

PS: The latest version of the extension is available in "Member Area" on our site.

Regards,
ARI Soft

Hello

, wauw, impressed!!!.....well and fast done!
It's working very well

thanks!
