
Graphic border for thumb

Posted by miroslav - 2010/11/06 19:30

Hello,

I dont have graphic border for thumb when I place colorbox in article with
{aricolorbox thumbWidth="150" thumbCount="1"}{/aricolorbox}
without placing "moduleId" attribute. If I place "moduleId" attribute and in the module choose "Single image" mod I dont have style for thumb again.

Is there solution for my problem? :blush:

Hello,

What graphic border you mean? If you mean "Shadow" theme, it's available for "Simple gallery" layout type.

Yes but I need "Shadow" theme for "Single image" mod, thats whay I try without placing "moduleId" attribute and with "thumbCount" set to "1"(I need to place more images not one like I wrote in example).
Is there any option to have something like "Single image" mod with "Shadow" theme for thumb? Maybe with "class" attribute set to... "something" :) or changing code in source files... Anything?

It makes sense. We'll implement this possibility within 48 hours.

We have updated "ARI Colorbox" module and "System - ARI Colorbox Anywhere" plugin. New version provides ability to choose theme for inline images.

Regards,
ARI Soft

Download the latest version of "ARI Colorbox" package, upgrade "ARI Colorbox" module and "System - ARI Colorbox Anywhere" plugin. After this open plugin settings page and choose appropriate page in "Inline Images -> Theme" drop-down or use theme="shadow" attribute for {aricolorbox} tag.

It's ok now :)

Thanks.

Best Regards
Miroslav
