
Does ARI PrettyPhoto work with F2CLite ?

Posted by spirit66 - 2011/02/01 08:15

Hi.

has anybody the knowledge or the experience if I can use Pretty Photo within F2CLite?

Thanks
Rudolf Aigner

Hello,

What type of integration F2CLite with "ARI Pretty Photo" you mean?

Regards,
ARI Soft

Hi,

well, if I use something like this {ariprettyphoto}..... like I do with pPGallery in an article which was created by F2CLite. I guess it should work but I would like to be sure before buying ARI Pretty Photo.

Thanks
Rudolf Aigner

Do you to place {ariprettyphoto} code into F2C template ("Template Manager" section)? If yes, the following code can be used into F2C templates:

```
{ldelim}ariprettyphoto activeType="imglist" dir="images/banners" thumbWidth="150"{rdelim}{ldelim}/ariprettyphoto{rdelim}
```

That's exactly what I need to do in the F2C templates. Does it work for your product too?

Thanks
Rudolf Aigner

PS: That's what I do for pPGallery

{Idelim}ppgallery width="140" height="120"
limit="1"{rdelim}stories/{F2C_IMAGES_PATH_RELATIVE}{Idelim}/ppgallery{rdelim}
