Not Working With Flicker

Posted by shawnsato - 2011/04/01 23:53

_____

Hi, just purchased your plugin for use with Flickr but can't seem to get it to work.

I am using the module with "Flickr gallery" options set. If I set the source to "Recent users photos" I get a bunch of divide by zero errors on PHP line 85 of mod_ariprettyphoto/includes/kernel/Web/Controls/class.Repeater.php. If I set the value to any of the other Flickr sources, I get no output (but jQuery, etc. loads). After the error messages, a single column of Flickr images loads. I assume the error messages are breaking the HTML/CSS. I know that Pretty Photo itself is capable of working, because I can load a set in from Picasa with no problems (my client requires Flickr).

Using Joomla 1.5.22, just downloaded the module today so it should be the latest version.

I can PM details. Thanks.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate the problem or if it impossible provides settings of the module if you use "ARI Pretty Photo" or plugin code if you use "System - ARI Pretty Photo Anywhere" plugin and settings of the plugin?

Regards,
ARI Soft
