# Display problem with lightbox popup.

Posted by navidmitchell - 2011/04/02 00:56

_____

Hello,

First off let me say I love your module.

I have a problem with it displaying correctly on my customers site. It worked fine in my test environment.

The box is separated and the small thumbnails are only displaying an arrow.

I hope you can help me out.

Here is a screen shot of the problem

Also you can see here.

_____

Hello,

This is the problem with site template styles. Add the next CSS rules to site template CSS file that fix it:

```
.pp_pic_holder div
{
 padding: 0;
}

body .pp_gallery li.default a img
{
 display: block;
}
```

Regards,
ARI Soft
