
Not Working: Using ARI Pretty Photo with image map

Posted by chrisweb - 2011/04/16 15:19

I already search the forum about image map, and found some instruction how to use ARI Pretty Photo with image map

Here's the link

I already follow the instruction, but the pretty photo still not working.
Here's my script

What I'm trying to do is to show the map detail using pretty photo & image map
And when I open one of the map detail, I can navigate to previous or next map detail

Please advice...

Thanks before

Hello,

Could you provide link to page where you try use "ARI Pretty Photo" with image map?

Regards,
ARI Soft

Ok. I already replaced with the new one, it works now. Thank you.

Since I have multiple images and image maps, is there another setting to make the ARI Pretty Photo as a Gallery?
So the Pretty Photo can display forward and backward navigation button.

Please advice...

Specify "rel" attribute of tag in the next format:

rel="prettyPhoto"

Where gallery_name is gallery group. The lightbox provides navigation between items with the same gallery group.
