full screen icon for external pages

Posted by eliecer - 2011/05/27 01:51

_____

Hi there,

I am just wondering if it could be possible to add a full screen button beside the close button in the popping up windows when I am using Pretty Photo for external pages?

Something similar of what you can do with youtube videos.

For example: Click on any of the ads from the left side at www.virtualbc.ca

I would like to have a full screen button some place in the popping up window.

Thanks

_____

Hello,

The extension doesn't provide ability to show the button for external links.

Regards,
ARI Soft
