Not able to get anything to work

Posted by snvital - 2011/06/20 16:15

_____

I am not able to get youtube videos or modules to open in articles. In addition its not clear in how to get images to pop up.

www.rocbiz.com

Scelerisque et leo article.. im trying to figure out how to add the youtube videos

and also how to add modules

This is what ive been doing for youtube

{ariprettyphoto activeType="rcontent" width="300" height="250" url="http://youtu.be/Hl_HbwnjHLI" link="Show google site" title="Google"}{/ariprettyphoto}

This is what i am doing for modules

{ariprettyphoto activeType="module" width="300" height="250" id="" link="Show Joomla! module" title="Joomla! module"}{/ariprettyphoto}

I have yet to get any of this or pictures to work

_____

Hello,

1. Correct code for YouTube video looks like:

{ariprettyphoto activeType="rcontent" width="300" height="250" url="http://www.youtube.com/?watch=Hl_HbwnjHLI" link="Show google site" title="Google"}{/ariprettyphoto}

2. Code for loading module looks like:

{ariprettyphoto activeType="module" width="300" height="250" id="85" link="Show Joomla! module" title="Joomla! module"}{/ariprettyphoto}

Check that module with ID equals to 85 is enabled.

About picture, do you want to create image gallery for images from specific folder(s) or add lightbox effect to single image? If you want to use this for single image, do you want to create thumbnail for this image and show original image in lightbox or show a remote page in lightbox?

Regards,
ARI Soft

_____

Id like to know how to do both

===

Re:Not able to get anything to work

Posted by admin - 2011/06/22 21:00

_____

If you want to create image gallery based on image from /photos/album1 folder, use the next code:

{ariprettyphoto activeType="imglist" dir="photos/album1" thumbWidth="150"}{/ariprettyphoto}

If you want to show remote page when a user clicks by a thumbnail, use the next code:

{ariprettyphoto activeType="rcontent" width="300" height="250" url="http://www.ari-soft.com" title="Google"}{/ariprettyphoto}

Where LINK_TO_THUMBNAIL is link to thumbnail.

Regards,
ARI Soft

_____

I got youtube to work but not when in my tab

www.rkyou.com should be on the right under joomla facts

the link is listed as work... i does however work when in the article.

I still cant get module to work just yet

_____

Plugin code appears on provided page because it seems your WYSIWYG editor convert spaces to " ". Switch WYSIWYG editor to plain text mode and fix plugin code.
