
text out of prettyphoto frame - internet explorer

Posted by eliecer - 2011/07/16 00:55

Hi guys,

All text is going out of pretty photo frame using internet explorer 9. It's working fine in the rest of the browsers.

Where to see the problem?

- www.virtualbc.ca
- click on the category - movies / Cinemas
- Click on any of the markers
- Click on the picture

How can I fix this problem?

Hello,

It is not a problem with "ARI Pretty Photo", this problem with HTML code of pages which associated with images. Try to remove HTML tag from the pages.

Regards,
ARI Soft
