## Activating Background with deactivating Theme

Posted by eraz - 2011/08/18 12:12

---

Sorry for posting so much ^^

But i would like to give my gallery a background without activating a Theme (Shadow, Pin, Clip Flora)?  
The Background disappears if no Theme is selected,...

What CSS rule do you use that attach the background?

I am using this one for the background color:

TABLE.ari-theme-shadow

```
{  
  background-color: gray;  
}
```

And this one for the thumbnail Border color (but i think i will not use this in the future)

TABLE.ari-theme-shadow .apretty-inner

```
{  
  background-color: black;  
}
```

Use the next CSS rule:

TABLE.prettyphoto-simple-table

```
{  
  background-color: gray;  
}
```
