YouTube Video Thumbnails into Lightbox

Posted by sophieshiatsu - 2011/10/07 04:08

_____

Hello

Can you tell me how I can get youTube videos as thumbnails then when you click on them they can show larger in a lightbox.

Thanks :)

_____

Hello,

The extension doesn't provide ability to show thumbnails from YouTube, but it provides ability to enter path a thumbnail manually. Code for "ARI Pretty Photo Anywhere" plugin looks like:

{ariprettyphoto activeType="rcontent" width="300" height="250" url="http://www.youtube.com/watch?v=qqXi8WmQ_WM" title="Video"}{/ariprettyphoto}

Where LINK_TO_THUMBNAIL is a link to a thumbnail.

Regards,
ARI Soft

_____

Hello, Many thanks for your reply but I think I am missing something important here. I tried this code but I don't get my thumbnail and I am unable to click into a lightbox. I just want to click on a thumbnail image of a youtube video into a lightbox like you do with the images but just can't seem to get it to work.

_____

Sorry, but could you explain what problem you have with provided code? Is it possible to see it anywhere?

Regards,
ARI Soft

_____

Hello,

Here is a Link to website to see the page I have put the video on.

The first image when clicked shows the lightbox but no video. It is blank.

The second one is your video link and the thumbnail shows underneath it.

I hope you can make sense of this.

_____

Hello,

We suppose you use incorrect code. Could you provide temporary access to your J! backend by email so we could investigate the issue in more details?

Regards,
ARI Soft

_____

This problem with "Content - Easy Embed Video" plugin. Disable it and the lightbox will work fine.

PS: "Content - Easy Embed Video" transforms all YouTube links to Flash objects.

Regards,
ARI Soft
