
Specific module not working well in specific page

Posted by eleclipse - 2012/05/11 15:06

Hello,

Here i'm again, i hope is the last time.

I'm having a really strange problem, i'm using with success the module in all the site, with a lot of gallery, but in this 2 pages:

http://www.febaferrobattuto.it/index.php?option=com_content&view=article&id=148&Itemid=279&lang=it

http://www.febaferrobattuto.it/index.php?option=com_content&view=article&id=145&Itemid=276&lang=it

The description and title are now shown, i checked over and over the module and it have the same setting of the other that are working and the csv seem ok, i don't understand what's going on :(

Thanks in advice for any help.

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Try now please. Your CSV files contained empty lines.

Regards,
ARI Soft
