## How would I accomplish this?

Posted by KremeChoco - 2012/09/25 03:46

---

So I been trying to do the following:  
Have several links to images for example:

ImageLink1 ImageLink2 ImageLink3

And of course, when you click on it, the image will pop up. However, how would I be able to make it so:

1. If I click ImageLink1, I can click the arrow on the right to move onto ImageLink2
2. No resizing is done.

Hello,

If ImageLink1,ImageLink1,... are links which are created in an article using HTML code like the following code:

It is possible to use "System - ARI Pretty Photo" plugin and use the following code for links:

Where LINK\_TO\_IMAGE is a link to an image.

Regards,  
ARI Soft
