Class \'AriSimpleTemplate\' not found - Fatal error

Posted by kwakker35 - 2010/05/27 21:23

Hi i have just set up my website on my remote server usinh akeeba backup. All was working correctly on my devlaptop.

I have tried to add and remove the module several times with no luck.

Url:
http://81.179.239.124/esam/index.php?option=com_content&view=article&id=22&Itemid=28http://81.179.239.124/esam/index.php?option=com_content&view=article&id=22&Itemid=28

Can you please let me know what the problem is?

Site is now Joomla 1.5.17 on PHP 5.2.10. was ok on dev laptop php 1.5.15 php 5.2.9.

Note: did not work before remote site upgrade from 1.5.15 to 1.5.17.
Thanks

Chris

hi,it is now working correctly. Can you please letme know what the issue was and if it will happen again if I use this in aonther site ?

Thanks for the speedy response.

Chris :)

It was a bug in the extension which reproduced on some PHP version. We have fixed it and you can download updated extension in 'Member Area' on our site and install it on another site instead of old one.

Regards,
ARI Soft
