
Conflicts with Joomla Bamboo JFlickr ?

Posted by Merlin - 2010/06/09 04:53

I just purchased PrettyPhoto and "almost" love it. Except that right now, it is unusable for me...

My problem is that it apparently conflicts with Joomla Bamboo's JFlickr. One I enabled the PrettyPhoto plugin (and it worked great), my JFlickr plugin quit working :(I really need that one.

I know JFlickr uses JQuery, and comes with a special library/plugin for loading the .js.

What does PrettyPhoto use?

Please help resolve this conflict? Thanks.

Hello,

Could you provide temporary access to your Joomla! backend by email and link to page where we can see this issue? It helps us investigate this issue and provide solution ASAP.

Regards,
ARI Soft

Try now, please. This issue appeared due to jQuery library was loaded twice on your site.

Regards,
ARI Soft

Per the email you sent:

YES, this works great now.

THANKS to Ari-Soft for this outstanding support!!!

A great product that we'll look for more ways to make use of, and now great support as well.

I highly recommend Ari-Soft to others.
