
A serious conflict with mmBackground

Posted by plooney - 2010/10/14 13:30

I have installed your "pretty" extension in this site (and this page..)
but popup engine don't work! (you can test..) When i disable the plugin mmBackground all is ok. But i need that the
extensions works togheter!!
Please support me.
Thank You, and forgive my terrificant english

Hello,

This is a problem with "MM Background" extension. This extension creates clone of DOM elements and remove original
elements due to all elements preparation which were done by "ARI Pretty Photo" is discarded. We have updated the
extension, download and upgrade module and plugins please. New version contains new parameter called "Load
method". Set it to "On Load", it should help.

Regards,
ARI Soft
