## Creating a gallery with mixed content

Posted by AndrewTrecha - 2010/11/30 01:15

---

i'm trying to recreate the contents of this page - <http://www.evepic.com/on-road/>  
(note - the original site was done in wordpress and is NOT using ARI Soft.)

here is my page - <http://www.evepic.com/joomla/on-road.html>

you'll notice that i've manage to create a link that displays some inline content (a youtube video).

what i would like to do is create a gallery like the first example that has mixed content, ie. inline content (youtube video), and a couple of images.

is this possible and how do i go about setting it up?

Hello,

If you want to show YouTube video, you can use the next code:

Video

This code requires "System - ARI Pretty Photo" plugin.

or you can use the following code:

```
{ariprettyphoto activeType="rcontent" width="300" height="250" url="http://www.youtube.com/watch?v=qqXi8WmQ_WM" link="Show video" title="Video"}/{ariprettyphoto}
```

This code requires "System - ARI Pretty Photo Anywhere" plugin. That group mixed content into a gallery, use "groupName" attribute of {ariprettyphoto} tag, it will look like:

```
{ariprettyphoto groupName="GALLERY_NAME"}  
....  
{/ariprettyphoto}
```

or the following "rel" for anchor tag if you use "System - ARI Pretty Photo" plugin:

...

Where GALLERY\_NAME is gallery ID. Content items with different gallery ID will be grouped in different gallery.

Regards,  
ARI Sfet
