## swf banner covering pretty photo

Posted by eliecer - 2010/12/22 03:02

---

Hi guys,

I just notice that if pretty photo opens on top of my swf banner, the swf banner stays on top of the dark layer an white border. (doesn't go behind the dark layer at all)

- Go to <http://www.virtualbc.ca>
- Click on Movies / Cinemas
- Click on any of the 4 icons
- Click on the picture
- Scroll the page up / down in order to have the prettyphoto on top of the banner

Is there any way to fix this?

Safari and Firefox V.3.5.16 - The SWF File stays on top of everything (even on top of prettyphoto)

Internet Explorer and Google Chrome - The SWF File stays on top of the white border

Hello,

This problem with SWF file, add wmode="transparent" to "embed" tag of Flash object and to "object" tag of Flash object.

Hi,

Now, I can not see the banners at all.

Is there any other possible solution?

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue in more details?

Hi,

---

info has been sent to info@ari-soft.com

NOTE: I removed the wmode="transparent" from the code.

Sorry, we can't login with provided credentials, but do the following please:

1. Return back wmode="transparent" attribute.
2. Add the following CSS rule to your site template CSS file:

```
body #banner_large
{
  z-index: 999;
}
```

It should help.

Thanks for your awesome support.

Looks it's working now.
