
function.unlink

Posted by artdirector_1 - 2011/03/13 16:02

hi!

I used fancybox to load flickr galleries in my website but, although the galleries are loaded fine,
I got few errors of function.unlink.
They can be viewed here:

www.ottotto.it

What they depend from?

Thanks in advance for any suggestion

Hello,

Check that "D:\inetpub\webs\ottottoit\cache\mod_arifancybox\" folder has writable permissions.

Regards,
ARI Soft
