## 'Open on load' and ARI Image Slider

Posted by edtheartist - 2011/03/22 18:41

---

Hi forum / Admin -

A simple test will show that 'Open on load' and ARI Image Slider don't work together. i.e. when there's image slider on the same page, fancybox doesn't open on load.

Any workaround?

thanks  
Ed

Hello,

Could you provide link to page where we can see the issue?

Regards,  
ARI Soft

For testing purposes:

<http://www.kingdom-networks.com/>  
<http://www.kingdom-networks.com/about-kingdom-networks>  
<http://www.kingdom-networks.com/free-membership>

all have a welcome fancybox message that should show up every time. Clicking on a link near the bottom of the pages ('Welcome Message') will manually show the fancy box. As may be seen, the first two pages have ARI Image Slider.

Only the last link can actually popup the fancybox automatically.

thanks  
Ed

Download "ARI Fancybox" package and upgrade the module and the plugins please. It should help.

Looks like problem fixed by the new release. Will update if there's further info.
