feature request: \'Open on load\' expiry hours

Posted by edtheartist - 2011/03/23 19:09

_____

Admin -

Would you consider this new feature for fancybox. With 'Open on load', allowing a further option so that a number of hours (e.g. 24, 48) may be manually entered, so that the fancybox will pop up again after the specified number of hours.

Currently for our use as an example (a popup welcome message), 'always on' is annoying for the visitor, and 'only once' is not quite enough.

thanks,
Ed

_____

If so, the newly implemented cookie should probably overwrite the 'only once' cookie created before.

thanks
Ed

We made some change with the setcookie command in the relevant file and we're good to go. We set it so that the same browser session will show the welcome message only once.

So we're fine. thanks.

Ed

For the benefit of other users who don't want to tweak code, perhaps making that an option? i.e. 'Current browser session'. It seems simple enough to implement and rather useful.

My two cents.

thanks
Ed

_____

We have updated the module. New version contains "Cookie duration" parameter which accepts cookie duration in days. If this parameter is set to "0", the lightbox will be shown automatically for each new browser session. As usual new version is available in "Member Area".

Regards,
ARI Soft
