ARI Fancybox not hiding on click

Posted by Jonathan - 2011/05/31 02:49

_____

I have ARI Fancybox opening remote content on page load from a Fancybox module. I want it to hide when either the content or overlay are clicked. I have both "Hide on overlay click" and "Hide on content click" set to yes, but clicking has no effect. Am I misunderstanding what it is that these settings are meant to do?

Here's a link to my test page: http://bit.ly/mGTqHr

Thanks for your help.

Regards,
Jonathan

_____

Hello,

"Hide on content click" parameter doesn't work for remote pages. It works for inline content and images.

_____

Then I guess the "Hide on content click" parameter doesn't work for articles or modules either, is that correct?

_____

It doesn't work for content which is loaded into . These are remote pages and articles.
