
ARI Fancybox not working--inline content not showi

Posted by mrjblaque - 2011/07/11 01:31

I just purchase the Fancybox product and trying to test it out. When I copied the example that was given:

Test content

Show HTML

only a blank screen pop up with the title under it.

Can someone please tell me how to solve this problem!!!! <http://www.ari-soft.com/images/fbfiles/files/fancybox.doc>

Hello,

Could you provide link to page where we can see the problem?

Regards,
ARI Soft

Sorry, code sample contains mistake. Use the next code please:

Test content

Show HTML

Regards,
