## arifancybox activeType=\"article\"

Posted by midone - 2011/07/15 10:03

---

Hello,  
I'm trying to use the recall of article with this simple line :

```
{arifancybox activeType="article" opt_width="300" opt_height="250" id="21" link="ShoW My Article" title="My Article"}{/arifancybox}
```

but does'n work at all .  
Could you also list all the activeType we could use ?

Many Thanks

=====

Hello,

Could you explain in more details what doesn't work? You see plugin code or when you click by link the lightbox doesn't appear? Where we can see the problem? All available plugin parameters can be found in documentation on plugin settings page in "Description" field.

Regards,  
ARI Soft

---

on this page

[http://www.asdterredellagrande.it/index.php?option=com\\_content&view=article&id=9&Itemid=4&lang=en](http://www.asdterredellagrande.it/index.php?option=com_content&view=article&id=9&Itemid=4&lang=en)

the line used on this article is :  
{arifancybox activeType="article" opt\_width="300" opt\_height="250" id="21" link="Show article" title="Article"}{/arifancybox}

Also I would like to use an image instead of a text for my link, how could you do that ?

Provided code works fine on our test server. Could you provide temporary access to your J! backend by email that we can investigate the issue?

Regards,  
ARI Soft
