
Link to a single image from thumbnail

Posted by bretsong - 2011/08/22 03:03

Hi

I was wondering if I can link to a single image by clicking on a thumbnail in ARI Fancybox?

The target (larger) image would be in a folder with other images but I just want the single image to open in the lightbox without arrows to other images.

Any help would be appreciated.

Kind Regards
brett

Hello,

You can use the next code:

```
{arifancybox activeType="inlineimg" thumbWidth="200"}
```

```
{/arifancybox}
```

Where LINK_TO_IMAGE is link to original image which you want to show in the lightbox. Thumbnail with necessary size will be created automatically.

Regards,
ARI Soft

Thank you very much. This solution has worked perfectly for what I needed.

Kind Regards
Brett
